LAKSHIT SHARMA

Software Engineer – AI | GenAI | Python | FastAPI | Django | React | Automation

North East Delhi, India | +91 9910933221 | lakshitharitash@gmail.com

Portfolio: lakshit-portfolio-8.netlify.app | GitHub: github.com/lakshisharma7 | LinkedIn: linkedin.com/in/lakshit-sharma-448949289

PROFESSIONAL SUMMARY

Software Engineer Intern with hands-on experience building AI-assisted software applications, automation workflows, APIs, dashboards, and employee productivity systems. Experienced with Python, FastAPI, Django, React, Next.js, PostgreSQL, REST APIs, SQL, and modern AI-assisted development workflows.

Currently working on production-oriented applications involving AI integration, API development, authentication, RBAC, activity tracking, system monitoring, automation, and cross-platform desktop applications. Strong interest in Generative AI, AI Agents, workflow automation, and AI-powered software engineering.

TECHNICAL SKILLS

Programming	Python, JavaScript, SQL, HTML, CSS
Backend & APIs	FastAPI, Django, REST APIs, API Integration, Webhooks, JSON
Frontend	React.js, Next.js, Vite, Tailwind CSS
Databases	PostgreSQL, SQL
Data Analytics	Pandas, NumPy, Power BI, Data Cleaning, Dashboards, KPI Reporting
AI / GenAI	Generative AI, AI-assisted Development, AI APIs, Prompt Engineering, AI Agents, LLM Integration
Automation	n8n, Workflow Automation, API Automation, Webhooks
Desktop	PySide6, Windows Desktop Applications, macOS Applications
DevOps	CI/CD, Jenkins (Build, Test and Deploy Pipelines)
Tools	Git, GitHub, VS Code, Figma, Postman, PyInstaller
Engineering	Authentication, RBAC, Error Handling, Logging, Version Management, Testing, Debugging, Deployment

PROFESSIONAL EXPERIENCE

Software Engineer Intern — Indovision Services | Apr 2026 – Present

- Develop and maintain software applications using Python, FastAPI, Django, React, Next.js and PostgreSQL.
- Build and integrate multiple REST APIs and backend functions for authentication, device registration, activity tracking, attendance, tasks, screenshots, synchronization and application management.
- Develop Workpulse, a cross-platform employee productivity monitoring application using Python and PySide6.
- Implement activity/session tracking, idle detection, system-health collection, screenshot capture, local data handling and backend synchronization.
- Develop API-driven synchronization with dynamic configuration, device tokens, batch processing and upload status handling.
- Work on authentication, user/device management, RBAC and role-specific application workflows.
- Build Windows and macOS application packaging workflows using PyInstaller, Windows installers and macOS DMG builds.
- Set up Jenkins CI/CD pipelines to automate application build, testing and deployment workflows.
- Debug production issues involving APIs, HTTP errors, synchronization failures, authentication and desktop application behavior.
- Use AI-assisted development workflows to accelerate implementation, debugging, documentation and code analysis.

Data Analytics Intern — Nexen Bloom, Noida | Feb 2026 – Apr 2026

- Worked with Python, Pandas, NumPy, SQL and Power BI for data analysis and reporting.
- Performed data cleaning, transformation and visualization for business reporting.
- Built dashboards and reports to communicate KPIs and operational insights.
- Used SQL for data extraction, filtering, aggregation and analysis.

KEY PROJECTS

Workpulse – AI-Assisted Employee Productivity Platform | Python, PySide6, REST APIs, PostgreSQL, Windows, macOS, PyInstaller

- Developed a cross-platform desktop productivity monitoring application for employee activity tracking.
- Implemented application/session tracking, active and idle time calculation, screenshots and system-health monitoring.
- Built local-first activity processing with backend synchronization and configurable batch uploads.
- Integrated device enrollment, dynamic device tokens, authentication and API-driven configuration.
- Implemented automatic startup, tracking-resume and application update/version-management workflows.

TA-ATS – AI-Powered Talent Acquisition Platform | Next.js, React, FastAPI, Django, PostgreSQL, AI, MCP

- Developed an Applicant Tracking System for recruitment workflows and candidate information management.
- Built frontend modules using Next.js, React and Tailwind CSS and backend services using Django and FastAPI.
- Implemented role-based access workflows for recruiters, candidates, hiring managers, project managers and administrators.
- Developed recruitment workflow states including Draft - Pending Approval - Approved - Published.
- Integrated AI-assisted functionality and dynamic API-driven dashboard workflows.

AI Automation & Workflow Projects | n8n, REST APIs, Webhooks, AI APIs, Python, JSON

- Build AI-assisted automation workflows connecting APIs, webhooks and business applications.
- Explore AI agents, API integrations, workflow orchestration, JSON processing and AI model integrations using n8n.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering
Krishna Engineering College

CERTIFICATIONS & INTERNSHIPS

- Power BI for Beginners — Microsoft / Simplilearn SkillUP (Mar 2026)
- PowerBI Workshop: AI-Powered Dashboards — OfficeMaster (Feb 2025)
- 3 Day SQL Basics Course — Newton School (Mar 2025)
- Python Bootcamp — LetsUpgrade, NSDC & ITM Edutech (Mar 2025)
- JavaScript Bootcamp — LetsUpgrade, NSDC & ITM Edutech (Mar 2025)
- ChatGPT for Everyone — GUVI | HCL (May 2025)
- Front-end Web Development Internship (6 Weeks) — CSRBOX & IBM SkillsBuild (Jun-Aug 2024)
- Web Development Virtual Internship (4 Weeks) — CodSoft (Aug-Sep 2023)
- IBM SkillsBuild: Web Development Basics, Bringing Websites to Life with JavaScript, Website Testing and Deployment (Jul 2024)
